**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 15-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - a. Claims 15 and 16 have been amended to include the limitation that the multicast is comprised of information formatted as an audio signal for at least one audio device and information formatted as a visual signal for at least one visual device. Although it is inherent that at least one of the formats is present there is no prior art that either anticipates or renders obvious including both formats within the multicast.
  - b. Claim 15 includes the limitation "wherein the step of extracting comprises monitoring CallerID information in Frequency shift Keying (FSK) signaling of a voice stream." Examiner attempted to render this limitation obvious with the inclusion of Chapman, but Applicant has successfully traversed the argument. Chapman does use FSK and establishes that the use of FSK is well known in the art, but does not provide any motivation or advantages to using FSK over some other type of signaling.
  - c. Claim 16 includes the limitation "caching an IP address and Fully Qualified Domain Name (FQDN)." Applicant has also successfully traversed this argument. Examiner agrees that there is no motivation present for caching both the IP address and the FQDN.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

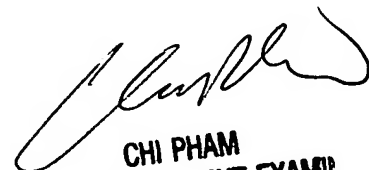

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Olson and Parham each disclose that FSK is well known and widely used, but neither provides motivation for its use.
